Fagron provides the best in innovation, solutions and quality and has been able to secure an exclusive position in everyday healthcare. This allows our customers to adequately respond to the growing worldwide need for tailor-made medication.

Our extensive range of innovative vehicles developed by Fagron R&D and over 5,000 Active Pharmaceutical Ingredients (APIs), excipients, inflammables and herbs are daily accessible, globally for the pharmaceutical, veterinary, food, nutraceutical and cosmetic industries. Our offer also includes an extensive range of other products, such as packaging materials, capsules, appliances, balances and miscellaneous laboratory instruments and utilities. With our pharmaceutical raw materials, innovative vehicles and wide range of services, we not only guarantee product quality, but also ensure ease of use.

We offer raw material conditioning according to specific production requirements, the highest quality raw materials from reputable producers and third-party compounding and contract manufacturing. All of our activities comply with comprehensive documentation, in line with current GMP/GDP directives.

Fagron is fully compliant with the Falsified Medicines Directive. In force since 1 July 2013, this requires written authentication to accompany each import of an API from a country outside the EU and ensures patient safety and controlled trading. We only approve suppliers that have successfully completed the Fagron Group Supplier Qualification process, including on-site audits.

Over 160 Fagron pharmacists are continually developing new, unique products and concepts to meet the growing worldwide demand for tailor-made medication. We are a R&D scientific company that is fully committed to optimisation and innovation in pharmaceutical solutions. Our dedicated approach has recently led to the development and introduction of a new and extensive generation of innovative vehicles that are introduced globally. We invite you to read about the benefits and qualities of these new products in the Fagron Innovative Vehicles Flyer.

Fagron, the global market leader for specialised pharmaceutical solutions!

Ger van Jeveren, Founder and CEO Fagron Group
Our values define what we are and what we aim to be. They reflect the way we should operate both internally and externally. Our values give us standards to measure ourselves by, particularly in our dealings with customers, suppliers, our own people and the wider world. The values have real meaning for us and the way we behave.

We believe in:
• Customer is number 1
• Entrepreneurship
• Speed of execution
• Results-driven
• Innovation
• Behave as a global market leader

Fagron unique added values

Combining the forces of procurement, manufacturing and quality management

More than 200,000 customers worldwide have access to over 5,000 high-quality pharmaceutical raw materials thanks to Fagron’s global product and producer qualification, full analysis of incoming and produced products, GMP conditioning and release by a qualified person. This unique position makes Fagron attractive to pharmacies, hospitals and the pharmaceutical, veterinary, food, nutraceutical and cosmetic industries.

Procurement
Fagron has sourcing offices in South America, North America, Europe and, in 2012, Fagron opened a sourcing office in Shanghai (China). This brings Fagron closer to the world’s biggest producers of pharmaceutical raw materials so it can source its pharmaceutical raw materials globally while operating close to the production sites. This results in full traceability and a high standard of quality. On-site producer audits, (re)qualifications and regular performance assessments guarantee continuous control of Fagron’s product portfolio. Securing that pharmaceutical raw materials quality is in accordance with the latest editions of worldwide pharmacopoeias, and ensuring that all pharmaceutical raw materials in Fagron’s range are produced in factories which are inspected by regulatory agencies including FDA, EMA and ANVISA, and are GMP-compliant, is essential to Fagron’s being able to guarantee its high quality standards. Pharmaceutical raw materials are subjected to a rigorous process of tests. The results of these tests and the extensive range of documents Fagron demands from producers are reviewed by a qualified person before products are released.

Manufacturing
Fagron produces standardised products as well as products tailored to specific customer needs in a manufacturing network that includes its own production facilities and contract manufacturers on three continents, all meeting the latest national and international standards (GMP and GDP). Regular audits are performed internally and by third parties.

At 15 sites with more than 150 clean rooms, Fagron manufactures creams, syrups, compounded medication and other high quality products for pharmaceutical purposes. These products come in a wide range of packaging including containers, tubes, bottles, syringes and blisters.

Quality management

From selecting a producer until delivery of a Fagron product to the customer, Fagron Quality goes through multiple steps as the following table shows. Fagron employs over 160 pharmacists worldwide. Within Quality Management, there are over 140 professionals who maintain and ensure Fagron’s high quality standards.

To go even further in meeting our customers’ needs, Certificates of Analysis (CoA), Material Safety Data Sheets (MSDS), and technical specifications are available for all our products online (fagron.com) or upon request.
Fagron innovative solutions

As the only multinational one-stop-solution for pharmaceutical compounding, Fagron R&D develops innovative concepts and solutions that respond to the specific and individual wishes of compounding pharmacies all over the world.

Fagron’s unique and innovative solutions

In Fagron’s Innovation department, over 160 pharmacists are dedicated to developing and providing innovative concepts, products and formulas that will meet the demands of the pharmacist, prescriber and patient.

Fagron innovative vehicles

For a full overview of the innovative products and concepts of Fagron, please visit fagron.com.

Benefits of Fagron’s innovative vehicles

- Innovative solutions for today’s challenges in compounding pharmacies.
- Used by pharmacists worldwide.
- Solutions answering the needs of patients and pharmacists.
- Improve patient acceptability, compliance and patient satisfaction.
- Easy preparation.
- Time-saving.
- Allow you to customise treatment to your patient’s needs.
- Compounding formulations available.
- Continuous conducting of scientific stability studies.

**Fagron specialised solutions**

Fagron’s GMP conditioning services

Fagron’s strength lies in its ability to seamlessly switch between a wide variety of customer requirements and actual production capability. With our innovative and customised solutions, our customers can benefit from the strength and scale of a large global network that is geared towards the particular needs of our customers. Fagron Industry's broad range of pharmaceutical raw materials and related services offers a 'total conditioning solution'. To help us provide our customers with a solution, we have developed a number of features and services.

- **Standard presentations**
  - Extensive range of products covering various sectors, including the pharmaceutical, nutrition, cosmetic and veterinary industries. The Fagron standard range consists of more than 2,500 products. All products are fully tested by Fagron and various pack sizes are available.
  - **Your benefit:** Single-source multiple choices!

- **Spot sales**
  - Free your working capital.
  - Tailor-made solutions
  - Your benefit: No minimum order quantity.

**Tailor-made solutions**

Fagron has more than 150 chemeneous where ingredients are not only conditioned for its own branded vehicles, but can be also sampled, listed and filled under private labels in quantities that precisely match your production process or requirements. Your benefit: Free your working capital.

**Spot sales**

Global sourcing of high quality pharmaceutical raw materials. You require a product that is not listed in our standard range? A new molecule or a formulation that has now expired? Fagron’s expertise and global network enables us to meet your specific requirements. Our products are supplied in the original manufacturer’s packaging and with the original certificate of analysis. We guarantee complete transparency.

**Your benefit:** Extensive supplier database, group purchasing power and established relationships. Freedom from the hassle of sourcing and the right material at the right time.
