How to compound a SyrSpend® SF Alka oral liquid dosage form?

- 6,3 g SyrSpend® SF Alka (dry) is needed for compounding 100 ml (12,6 g for 200 ml)

A. Using SyrSpend® SF Alka (dry) 40 g

1. Measure API and SyrSpend® SF Alka (dry)
2. Mix powders in mortar
3. Bring powders into recipient
4. Add water to final volume (by geometric dilution and shake vigorously after each addition)

Label: shake well before use

cnk: 3156049

B. Using premeasured SyrSpend® SF Alka (dry) 6,3 g

1. Measure API
2. Add API to dispensing container and shake
3. Add water to final volume (by geometric dilution and shake vigorously after each addition)

Label: shake well before use

cnk: 3260130

Remark: Amount of SyrSpend® SF Alka (dry) is independent of concentration of API.
